

## Assignment No : 2 -A

Create a New Repository on GitHub

Initialize Git Locally and Push Code

```
git init          # Initialize Git in the project
```

```
git add .         # Add all files
```

```
git commit -m "Initial commit" # Commit your code
```

```
git remote add origin https://github.com/YOUR-USERNAME/user-auth-app.git
```

```
git branch -M main      # Rename current branch to main
```

```
git push -u origin main  # Push your code to GitHub
```
